

YOUR AMAZON INTEGRATION JOURNEY

A proven implementation process for enterprise fashion brands

From Project Kickoff to Live on Amazon

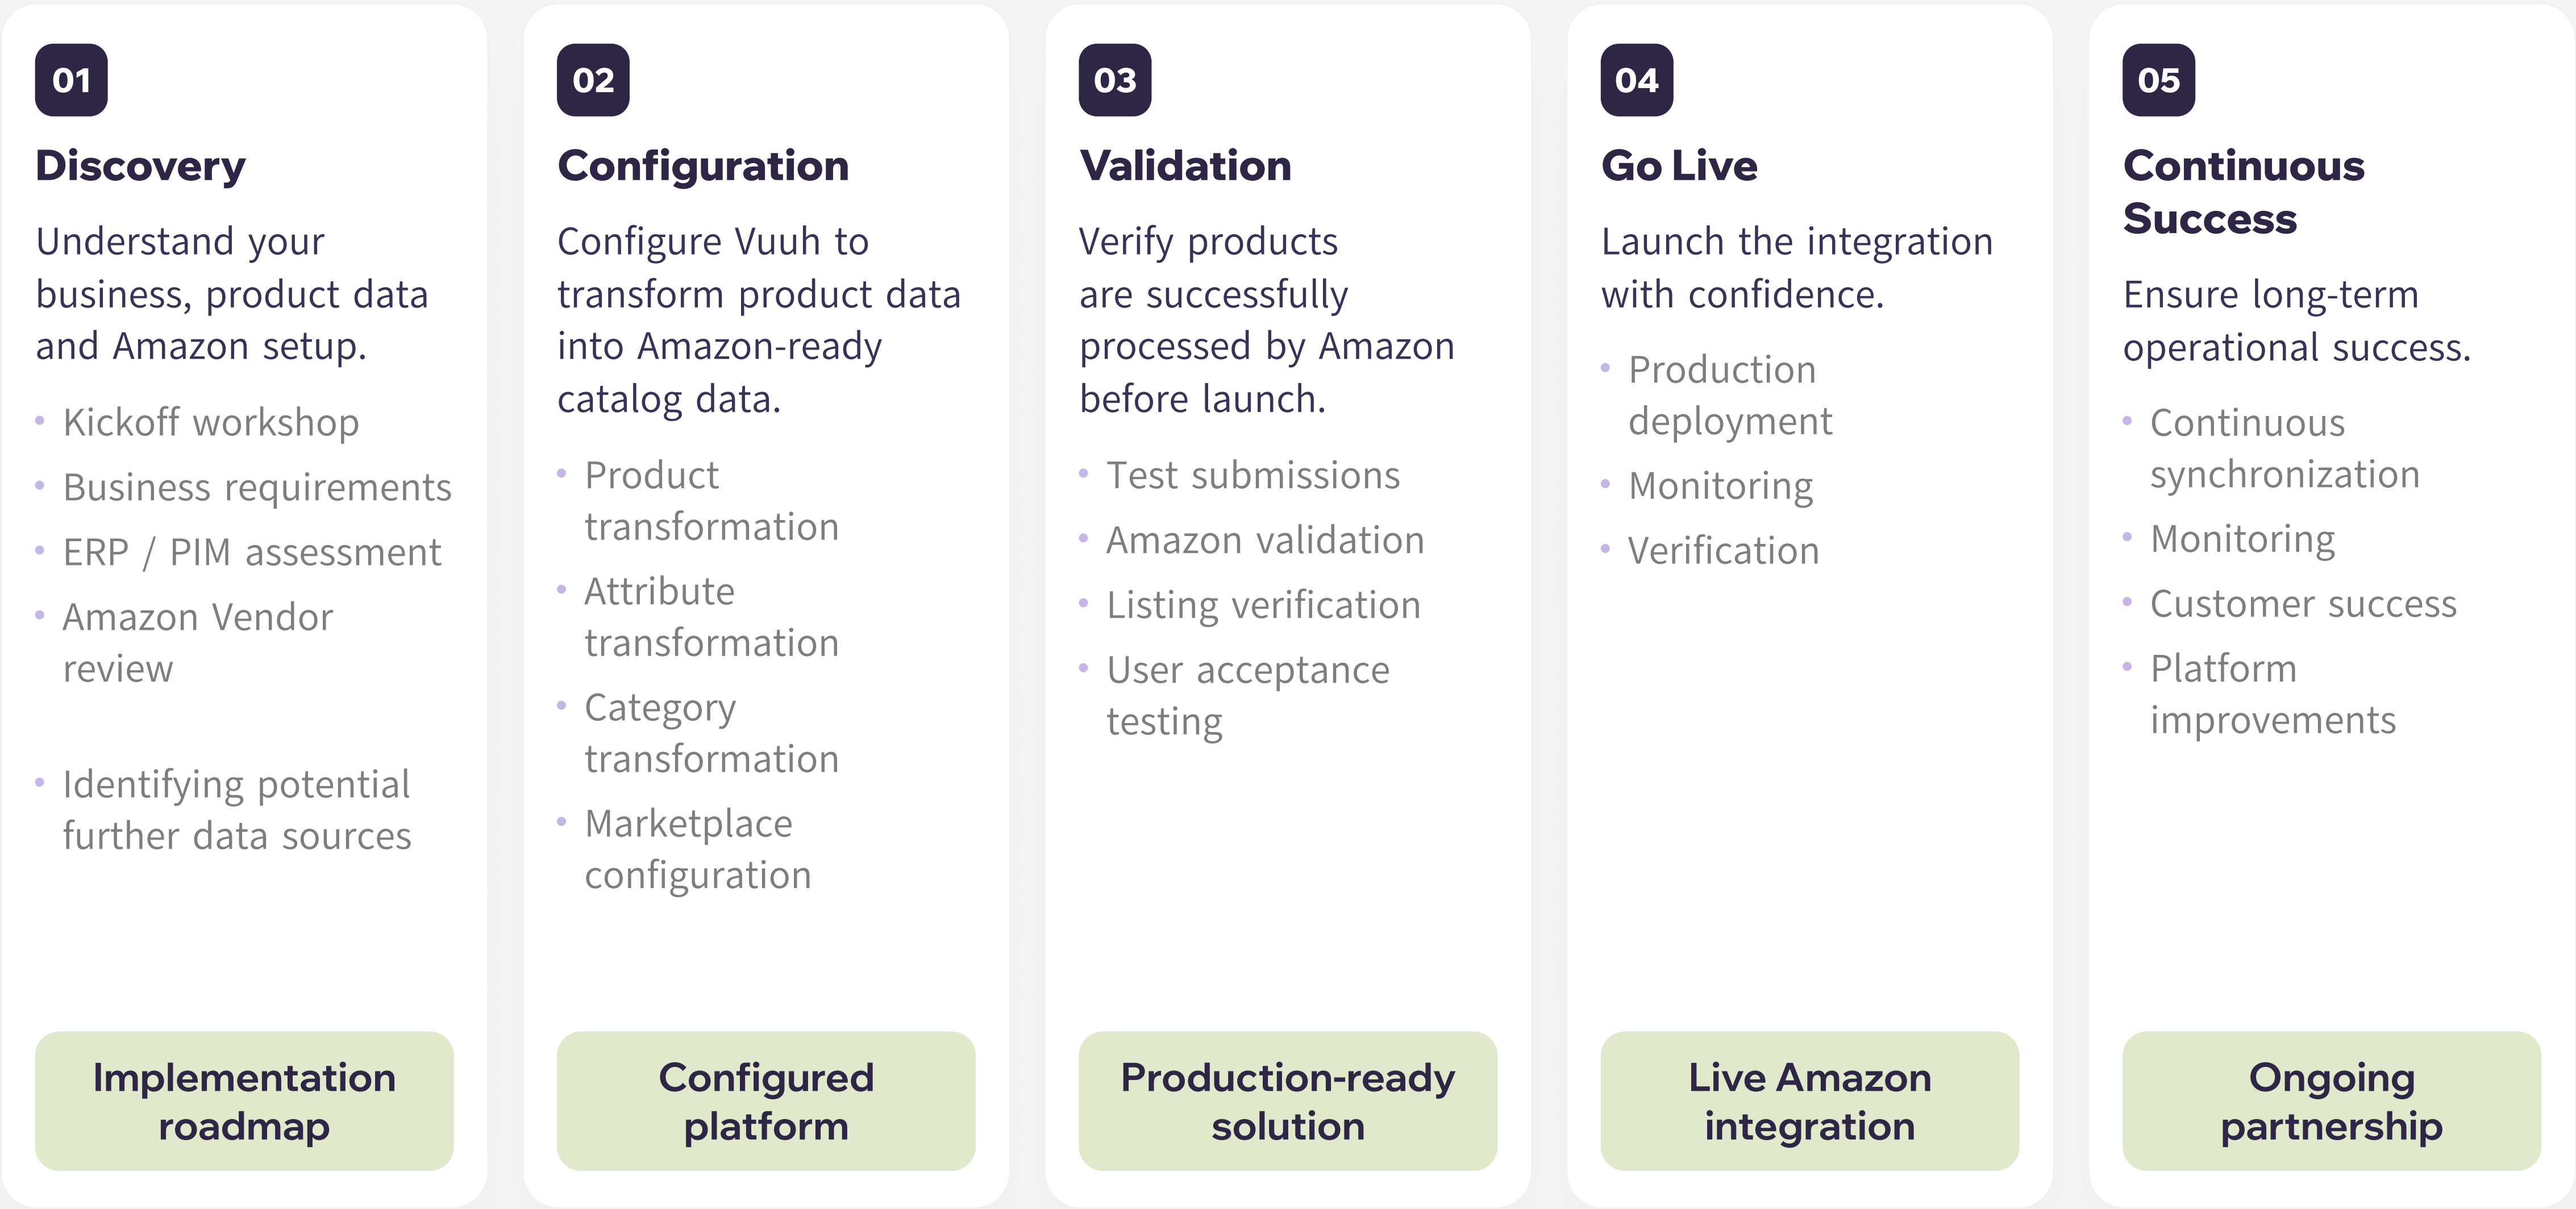

Enterprise implementations should be predictable, not disruptive. Vuuh's structured methodology takes fashion brands from kickoff to fully automated Amazon Vendor synchronization in a few weeks - led throughout by a dedicated implementation manager working closely with your teams and Amazon.

4 - 6 weeks TYPICAL IMPLEMENTATION

- ✔ Proven implementation methodology

- ✓

 Automatically create Amazon Catalog Items
- ✓

 Monitor submission status in real time
- ✓

 Automatically create Amazon Listings
- ✓

 Reduce manual operational work
- ✓

 Continuously synchronize product changes
- ✓

 Scale Amazon operations with confidence

Frequently Asked Questions

How long does implementation take?

Most enterprise projects are completed within 4 - 6 weeks, depending on data complexity and customer availability.

How much IT involvement is required?

Your technical team typically participates during Discovery, Configuration and Validation. Vuuh manages the implementation throughout.

Can we start with one brand?

Yes. Many customers begin with a single brand or marketplace before expanding.

How are product updates managed?

Vuuh continuously synchronizes product changes through Amazon's Vendor Central API.

How do we know if submissions succeed?

Every submission is monitored and reported, providing complete operational visibility.

What happens after Go Live?

Your dedicated Customer Success Manager continues supporting monitoring, optimisation and ongoing improvements.

“A process that previously took 3 - 4 weeks has been reduced by 50 - 60%.” - **Aylin Nauroth, CBO Operations, BESTSELLER**
